

KannaMill

Proven size reduction for a growing industry

Designed specifically to meet the challenges of processing cannabis

Built Tough for High Production Throughput

KannaMill cannabis size reduction equipment has been designed in partnership with high production cannabis processors. At the heart of every KannaMill, is our long history of manufacturing rugged, durable equipment. Our heavy-duty designs meet the demand for low maintenance, and are saleable for various levels of high-throughput production. We ship worldwide, and welcome inquiries for full custom equipment to meet customer specifications.

The KannaBevel™ – The Edge for Uniform Particle Size Distribution and Low Resin Build-up

The KannaMill differentiates itself with our application perfected, KannaBevel edge hammers. These hammers can handle thousands of pounds of raw cannabis over a wide range of resin and moisture contents, delivering consistent, uniform particle size with cleaner cuts. This means more consistent product quality for pre-rolls and edibles, as well reduced handling and waste. For extractors it means a more repeatable extraction process with higher yields. Stems

are handled with ease, significantly reducing time and personnel for stem removal.

Our proprietary anti-resin design limits resin buildup to for consistency cutting performance over many pounds of product, and facilitates easy cleaning when the need arises.

Model	Housing	Feed Opening	Rotor Diameter	Screen Area	Footprint	Power	Capacity
KannaMill 4	3/8"	4" x 4"	9"	65 sq. in.	18.5" x 20"	3/4 hp (0.6 kw)	Up to 100 lbs/hr
KannaMill 12	3/8"	4" x 12"	9"	187 sq. in.	18.5" x 37"	3 hp (2 kw)	Up to 300 lbs/hr

* All KannaMill models can be configured for international electrical requirements as indicated by customer

Below are further descriptions of our models. All models can be operated table top or using our available stand, with and without casters. Our KannaMill 4 models can be plugged into a standard 120 VAC, 20-amp outlet.

KannaMill: Food Grade

Constructed of NSF/ANSI Std. 51 Food Grade stainless steel, the KannaMill: Food Grade has been built to meet even the most stringent of code requirements for production operations. With our food grade model, all parts of the mill that come in contact with your product are in compliance. This includes the infeed, discharge chute, rotor and hammers, and mill housing.

KannaMill: Stainless

Constructed of 304 grade stainless steel, the KannaMill: Stainless has been built to facilitate ease of maintenance and cleanliness in the extraction process, as well as in processed material for pre-rolls.

KannaMill: Standard

Constructed of high quality carbon steel, the KannaMill: Standard has been built to facilitate easy and efficient cannabis processing.

features

Configuration Control

From whole plant to your specific size needs, KannaMill promises uniform, perfectly sized end product. KannaBevel edge hammers have been designed specifically for optimizing trichome exposure without compaction or separation from the underlying biomass, allowing KannaMill to pulverize without over-fiberization, eliminating the need to manually de-stem pre-roll material.

Anti-Resin system

KannaMill has been specifically designed with industry experts to meet the unique challenge of processing the notoriously high-resin content of cannabis. Every KannaMill comes standard with our anti-resin system for improved size reduction, and throughput. The Anti-resin systems also provides for easy cleaning and maintenance.

Scalable

As your business grows to process more volume, so does KannaMill. Scalable to 4" or 12" infeed opening to process up to 300 lbs/hr.

Plugs into standard wall outlet

KannaMill has been designed to be incredibly energy efficient, using only an 8 amp power draw – roughly equivalent to 3 cell phones. KannaMill can plug into a standard wall outlet, so there's no need for special electrical service.

Features & Options

Every KannaMill comes standard with two different screen sizes, standard Safety interlock and standard collection infeed and conveying options for easy feeding and collecting without product loss. A stand that accommodates a product collection tote is also available, with or without casters.
